## Description

Flag format: picoCTF{Malwarename}

The first letter of the malware name should be capitalized and the rest lowercase.

Your friend just got hacked and has been asked to pay some bitcoins to `1Mz7153HMuxXTuR2R1t78mGSdzaAtNbBWx`. He doesn't seem to understand what is going on and asks you for advice. Can you identify what malware he's being a victim of?

money-ware challenge

It seems to be asking about a malware and this seems to be a wallet address. I guess we can try checking it in google.

Okay it's Petya
