mus1c challenge

In this challenge, we need to use a certain language that is rockstar language. This language is has its own compiler and syntax. We can use the compiler here: <https://codewithrockstar.com/online>

Type your Rockstar program here, or try these examples: [fizzbuzz](#) • [99 bottles of beer](#)

```
shout fun times Pico CTF
put fun times Pico CTF into my song

build it up

shout it
shout it

build it up, up
shout it
shout Pico
```

Input:

Rock!

Output: [cancel](#)

```
114
114
114
111
99
107
110
114
110
48
49
```

Online Rockstar interpreter powered by [Satriani](#).

Here we can change the decimal given to ASCII, and it will give us:

Open File

Reset

Number delimiter

Space

☐ 0x/0b prefix

ASCII text

rrrocknrn0113r

Hex (bytes)

72 72 72 6F 63 6B 6E 72 6E 30 31 31 33 72

Binary (bytes)

01110010 01110010 01110010 01101111 01100011 01101011
01101110 01110010 01101110 00110000 00110001 00110001

Decimal (bytes)

110
48
49

Base64

cnJyb2NrbnJuMDEzM3I=

Length (bytes)

14

We can put the ASCII text to the flag format
